

# Neonatology Solutions NICU Directory: Updated Content

Scott Snyder, MD

Neonatology Solutions has updated and refined content for residents, fellows, and practicing Neonatologists who are searching for information about neonatology fellowship training programs. Within the NICU Directory page, users can select the Neonatology Fellowship Programs tab, which will open a map-based search function as well as all fellowship programs listed by state. Information regarding the number of fellow positions, program directors, division directors, and affiliated NICUs and training sites are all included.

*"Within the NICU Directory page, users can select the Neonatology Fellowship Programs tab, which will open a map-based search function as well as all fellowship programs listed by state. Information regarding the number of fellow positions, program directors, division directors, and affiliated NICUs and training sites are all included."*

We hope this resource helps trainees to efficiently find the information they need when searching for a future fellowship program or while networking and collaborating during training. As always, we appreciate any feedback regarding how to make this site the most valuable free Neonatology resource on the web.

**RESET**

RESULTS: 1961 NICUs

Click on map marker for NICU information

The map displays the United States with numerous orange circular markers indicating the locations of Neonatal Intensive Care Units (NICUs). The markers are densely packed in the eastern and central regions of the country, with fewer markers in the western and mountain regions. The map includes standard navigation controls like zoom in/out and a search bar.
